"Theodoros is one of those rare contractors that is a real expert in his field and delivers incredible results. Instead of just lazily installing a caching plugin, he took the time to really understand our websites (which were complicated - WP multi-sites with back end member software). This was crucial, because the cookie cutter approach would not have worked. Theodoros worked through the optimization process carefully until we had blazing fast websites with great scores. I am grateful we found him and HIGHLY recommend him to anyone looking to optimize their websites."

"Ted is in the 1% of people who actually know what they're doing when it comes to speed optimisation. He doesn't simply install a plugin and switch on a few options to increase speed. Ted did a real deep dive into our website and identified all the processes that slowed down our website and fixed it. Cleaned our database and gave us some very solid advice. Trust me this was not an easy task because we have a huge e-commerce website which had dramatically low scores. Now our speed scores are 90+ on almost every page. Need speed? I 1000% recommend you hire Ted."

"We had a website created by another freelancer on UW with a myriad of problems. Ted, worked miracles and went above and beyond to not only fix the problems, but advise on best practice 'what should be done and why' He also made recommendations outside the scope and ensured we had a working website to our satisfaction within a timely manner."

My one 'takeaway' from this is look for experts in their field and pay for quality, you only need to do the job once that way.

I would recommend Ted highly not only for his technical ability, but also for his commercial nous and his professionalism in responding to client needs"

★★★★★ 5.00

"Great work, will absolutely use Ted to speed up all my future websites! Very good communicator and delivered stellar results. Even went back a few times to fix little issues that I found such as certain pages or elements needing to be excluded, etc.

Ted took my site from a 30 to 97-99 on page speed and sales went way up after making his changes.

All around I had a great experience and highly recommend Ted to anyone with a WordPress site that they want sped up!"

"Ted is a high-skilled professional that delivers more than requested. I trust his service and his commitment to do the best for his clients.

Both sites are heavy with ads served from ad networks and built with Elementor. Regardless, the two sites are now clocking at 92+ on mobile and 99 on desktop.

I am happy to work again with him."

"Ted is one of the absolute best developers we have had the pleasure of working with on UpWork.

We came to Ted with a problem that we had tried solving with other developers, but had hit a wall. It was clear during the interview process that Ted knew his subject matter on a much deeper level than all the other applicants.

The tasks were completed well beyond our expectations, with a lot of free technical advice and help that is worth much more than what we had agreed on for this project. The hours were billed in the fairest way and it really made this an easy and positive experience.

Suffice to say, we will be in touch again soon with more projects to work on together. Thank you so much for your positive contribution to our website."

"Ted went above and beyond what was expected during the project. We will definitely reach out to Ted in the future for any issues we might come across on our side."

"Ted is a Rockstar when it comes to Page Speed optimization - a truly under-rated expert on Upwork. My website speed spiked in leaps and bounds after experiencing Ted's magical touch - mind-blowing to say the least. I've engaged different so-called 'experts' in the past but all they did was band-aid solutions.

Ted is refreshingly different. Initially I was skeptical, until I saw the speed metrics literally fly. He also went above and beyond to fix/optimize other related areas which I overlooked or didn't even know. One good example is one popular CDN I used - initially I didn't believe him when he said this CDN actually slows down my site instead of improving it but he was proven right.

A knowledgeable technical professional like Ted deserves the rate he asks for, so while you may be able to get 'cheaper' rates from others, end of the day, ask yourself whether you are looking for result or cheapest freelancer.

"Theodoros exceeded all expectations! I needed to speed up my website and was nervous about giving someone my website credentials. That fear quickly went away after working with Theodoros. He communicated the project and tasks well and got to work right away. He made the site very fast, but then my hosting service had an issue. He went above and beyond in fixing it. He even contacted the hosting company on my behalf and got it resolved. His knowledge is incredible and you can absolutely trust him to complete the job! I am actively looking for more ways to use his talents to improve my website."
